Cloud Ginger Kathrens 2012-11-06 Published as a companion volume for public television's Nature series, *Cloud: The Wild Stallion of the Rockies* is documentary filmmaker Ginger Kathrens's personal retelling of her years following the wild horse she named Cloud. Beautifully designed, the book is elaborately photographed and divided into seventeen chapters that follow the life of a wild stallion, just one of hundreds of horses that have

roamed wild in the Rocky Mountains for two hundred years. The book begins with the author and filmmaker witnessing the birth of a helpless white colt, that will soon capture her heart and imagination. Each subsequent chapter documents Cloud's interaction with his mare Raven, his brother Diamond, and other colts in the wild as well as his adventures encountering dangerous predators, older stallions, and human trappers. The author follows Cloud over the course of five years, taking note of his physical and behavioral development, as his begins to take on more of a leadership role in the band of wild bachelors he's joined, to become a fighter, a survivor, and a father. Kathrens's emotional involvement in Cloud's story is palpable, such as when she tearfully watches the young stallion get captured by trappers. Due to his unusual coloration, he is set free, though the other members of his band and sisters are removed and sold. Returning to the mountains every season, the author continues to look for Cloud in the vast wild habitat, always relieved to find him still living, despite fights, predators, and encounters with trappers. She is later is touched to see how Cloud, the five-year-old mare, grazes with his yearling son, the first of his new family. Kathrens's gripping observations of wild horses of the Arrowheads, their fights, struggles, and alliances, give the reader much insight into the fascinating behavior of these wild horses.

The Craft of Poetry Clement Wood 1929
The Matrix in Theory 2016-08-01 The Matrix trilogy continues to split opinions widely, polarising the downright dismissive and the wildly enthusiastic. Nevertheless, it has been fully embraced as a rich source of theoretical and cultural references. The contributions in this volume probe the effects the Matrix trilogy continues to provoke and evaluate how or to what extent they coincide with certain developments within critical and cultural theory. Is the enthusiastic philosophising and theorising spurred by the Matrix a sign of the desperate state theory is in, in the sense of "see how low theory (or 'post-theory') has sunk"? Or could the Matrix be one of the "master texts" for something like a renewal for theory as now being mainly concerned with new and changing relations between science, technology, posthumanist culture, art, politics, ethics and the media? The present volume is unashamedly but not dogmatically theoretical even though there is not much agreement about what kind of theory is best suited to confront "post-theoretical" times. But it is probably fair to say that there is agreement about one thing, namely that if theory appears to be "like" the Matrix today it does so because the culture around it and which "made" it itself seems to be captured in some kind of Matrix. The only way out of this is through more and renewed, refreshed theorising, not less.

Spinning the Globe Ben Green 2009-09-08 Before Wilt Chamberlain, Bill Russell, Julius Erving, or

Michael Jordan--before Magic Johnson and Showtime--the Harlem Globetrotters revolutionized basketball and spread the game around the world. In *Spinning the Globe*, author Ben Green tells the story of this extraordinary franchise and iconic American institution. We follow the Globetrotters' rise from backwoods obscurity during the harsh years of the Great Depression to become the best basketball team in the country and, by the early 1950s, the most popular sports franchise in the world. Green brings to life their struggles with racism and segregation, and their influence upon a nation's views about race and sport. We witness the Globetrotters' fall from grace to the brink of bankruptcy in the early 1990s, and their ultimate rebirth under Mannie Jackson today, as they once again amaze kids and families around the world. Now in paperback, this is the true and complete story of their amazing eighty years as a team, told with lyrical prose and masterful storytelling by Ben Green.

Artistic Research in Music: Discipline and Resistance

Jonathan Impett 2017-12-04 The Orpheus Institute celebrates 20 years of artistic research in music Artistic research has come of age, and with it the Orpheus Institute. Founded twenty years ago, the Institute's purpose from the start has been to pursue research through the practice of musicians. The Orpheus Institute is of the same generation as the field it was established to explore. Like many young adults, artistic research and its structures are still constructing their identity within a wider world. How have they developed? How will they mature? How can they negotiate relationships with institutions, disciplines, and bodies of theory and yet retain the essence of their work—the critical perspective of the artist? In the last two decades there have been major changes in the dynamics and structures of culture, its institutions and constituencies. How can artistic research maintain a productive dialectic between its potential status as a discipline and its core as radical practice? These and related questions are the threads woven

through this collection of essays and assessments by present and past members of the Orpheus community—researchers, scholars, administrators, advisors. Together and separately they weave a tapestry of past accomplishments, current research, and future perspectives. They celebrate the twentieth anniversary of Orpheus not with congratulations but with challenges and questions—a job for research, a job for the Institute, a job for the future. The wide range of contributors to this volume includes practitioner-researchers, theorists, and academic leaders from institutions at the forefront of artistic research in music. Contributors Tom Beghin (Orpheus Institute, Ghent), Paulo de Assis (Orpheus Institute, Ghent), Leonella Grasso Caprioli (Conservatorio di Vicenza), Jonathan Impett (Orpheus Institute, Ghent), Esa Kirkkopelto (University of the Arts, Helsinki), Kari Kurkela (University of the Arts, Helsinki), Susan Melrose (Middlesex University, London), Stefan Östersjö (Orpheus Institute, Ghent), Gertrud Sandqvist (Malmö Art Academy), Huib Schippers, Vanessa Tomlinson, Paul Draper (Queensland Conservatorium Research Centre, Griffith University), Luk Vaes (Orpheus Institute, Ghent), Janneke Wesseling/ Kitty Zijlmans (Leiden University)

Ajax Design Patterns Michael Mahemoff 2006-06-29 Ajax, or Asynchronous JavaScript and XML, exploded onto the scene in the spring of 2005 and remains the hottest story among web developers. With its rich combination of technologies, Ajax provides a strong foundation for creating interactive web applications with XML or JSON-based web services by using JavaScript in the browser to process the web server response. *Ajax Design Patterns* shows you best practices that can dramatically improve your web development projects. It investigates how others have successfully dealt with conflicting design principles in the past and then relays that information directly to you. The patterns outlined

in the book fall into four categories: Foundational technology: Examines the raw technologies required for Ajax development Programming: Exposes techniques that developers have discovered to ensure their Ajax applications are maintainable Functionality and usability: Describes the types of user interfaces you'll come across in Ajax applications, as well as the new types of functionality that Ajax makes possible Development: Explains the process being used to monitor, debug, and test Ajax applications Ajax Design Patterns will also get you up to speed with core Ajax technologies, such as XMLHttpRequest, the DOM, and JSON. Technical discussions are followed by code examples so you can see for yourself just what is-and isn't-possible with Ajax. This handy reference will help you to produce high-quality Ajax architectures, streamline web application performance, and improve the user experience. Michael Mahemoff holds a PhD in Computer Science and Software Engineering from the University of Melbourne, where his thesis was "Design Reuse in Software Engineering and Human-Computer Interaction." He lives in London and consults on software development issues in banking, health care, and logistics. "Michael Mahemoff's Ajax Design Patterns is a truly comprehensive compendium of webapplication design expertise, centered around but not limited to Ajax techniques. Polished nuggets of design wisdom are supported by tutorials and real-world code examples resulting in a book that serves not only as an intermediate to expert handbook but also as an extensive reference for building rich interactive web applications." --Brent Ashley, remote scripting pioneer

Buyology Martin Lindstrom 2010-02-02 NEW YORK TIMES BESTSELLER • “A fascinating look at how consumers perceive logos, ads, commercials, brands, and products.”—Time How much do we know about why we buy? What truly influences our decisions in today’s message-cluttered world? In *Buyology*, Martin Lindstrom presents the astonishing findings from his groundbreaking three-year, seven-million-dollar neuromarketing study—a cutting-edge experiment that peered inside the brains of 2,000 volunteers from all around the world as they encountered various ads, logos, commercials, brands, and products. His startling results shatter much of what we have long believed about what captures our interest—and drives us to buy. Among the questions he explores: • Does sex actually sell? • Does subliminal advertising still surround us? • Can “cool” brands trigger our mating instincts? • Can our other senses—smell, touch, and sound—be aroused when we see a product? *Buyology* is a fascinating and shocking journey into the mind of today’s consumer that will captivate anyone who’s been seduced—or turned off—by marketers’ relentless attempts to win our loyalty, our money, and our minds.
