Selected Legal Issues in Catholic Schools Mary Angela Shaughnessy 1998 This book examines legal issues that affect Catholic high schools. Chapter 1 discusses sources of the law and how fairness and due process, federal and state statutes, and various guidelines shape the law. Tort law, corporal punishment, search and seizure, defamation of character, and negligence are covered in chapter 2. Chapter 3 details issues surrounding student privacy and such issues as confidentiality of records, whereas chapter 4 describes the staff-student relationship and how the law governs confidentiality, sexual

misconduct, physical contact, and other behaviors. Since student confessions can be an important part of the teacher-student relationship, legal aspects of confidentiality, legal immunity, case law, the student journal, and school retreats are discussed. Chapter 6 looks at child abuse and neglect and considers statutory guidelines, inservice education, who should file a child-abuse report, and teachers and abuse. Sexual harassment is treated in the next chapter, which includes an overview of actions that constitute harassment and suggested policies for addressing reports of harassment. Other topics receiving treatment include accommodating students with special needs, extracurricular and cocurricular activities, personal conduct of professional staff, gangs, copyright law, school handbooks, and Catholic-school finances. Each chapter includes a section for reflection and discussion. (RJM)

Women and Wealth in Late Medieval Europe T. Earenfight 2010-03-15 The twelve essays in *Women and Wealth in Late Medieval Europe* re-examine the vexing issue of women, money, wealth, and power from distinctive perspectives - literature, history, architectural history - using new archival sources. The contributors examine how money and changing attitudes toward wealth affected power relations between women and men of all ranks, especially the patriarchal social forces that constrained the range of women's economic choices. Employing theories on gender, culture, and power, this volume reveals wealth as both the motive force in gender relations and a precise indicator of other, more subtle, forms of power and influence mediated by gender.

#MakeoverMonday Andy Kriebel 2018-10-02

Explore different perspectives and approaches to create more effective visualizations

#MakeoverMonday offers inspiration and a giant dose of perspective for those who communicate data. Originally a small project in the data visualization community, #MakeoverMonday features a weekly chart or graph and a dataset that community members reimagine in order to make it more effective. The results have been astounding; hundreds of people have contributed thousands of makeovers, perfectly illustrating the highly variable nature of data visualization.

Different takes on the same data showed a wide variation of theme, focus, content, and design, with side-by-side comparisons throwing more- and less-effective techniques into sharp relief. This book is an extension of that project, featuring a variety of makeovers that showcase various approaches to data communication and a focus on the analytical, design and storytelling skills that have been developed through #MakeoverMonday. Paging through the makeovers ignites immediate inspiration for your own work, provides insight into different perspectives, and highlights the techniques that truly make an impact. Explore the many approaches to visual data communication Think beyond the data and consider audience, stakeholders, and message Design your graphs to be intuitive and more communicative Assess the impact of layout, color, font, chart type, and other design choices Creating visual representation of complex datasets is tricky. There's the mandate to include all relevant data in a clean, readable format that best illustrates what the data is saying—but there is also the designer's impetus to showcase a command of the complexity and create multidimensional visualizations that "look cool." #MakeoverMonday shows you the many ways to walk the line between simple reporting and design artistry to create exactly the visualization the situation requires.
